

MALIK ADEBIYI

Toronto, ON | [Linkedin](#) | 437-247-0231 | malikbiyi@gmail.com | <https://ma3trix.github.io/Portfolio/>

PROFESSIONAL SUMMARY:

Experienced software professional proficient in DevOps and cloud architecture. Skilled in automation, software development, and CI/CD pipelines with a strong focus on scalability and performance. Dedicated to designing innovative solutions, enhancing application security, and contributing to efficient cloud-based deployments.

HIGHLIGHT OF QUALIFICATIONS

- 3+ years of experience and education in software development, specializing in DevOps practices and cloud architecture.
- Proficiency in technical documentation and technology research, contributing to project teamwork.
- Handled telephone inquiries and provided remote user support, demonstrating service desk experience.
- Expertise in AWS services, including cloud computing, networking, and security, alongside Microsoft Office 365.
- Adaptable to diverse working environments, showcasing resilience and problem-solving skills.
- Familiarity with Agile/SCRUM project management methodologies, ensuring efficient project execution.

TECHNICAL SKILLS

Programming:	Python, Swift, C#, Java, JavaScript, SQL, PowerShell, Bash
Web Development:	HTML, CSS, TypeScript, Angular, Node.js, React, MongoDB, REST API
DevOps Tools:	CI/CD, Docker, Jenkins, GitHub Actions, Terraform
Cloud Platforms:	AWS (EC2, S3, IAM, VPC, Lambda, CloudFormation, RDS, Route 53), Azure Active Directory, AWS Managed Microsoft AD

EDUCATION

Full-Stack Developer Bootcamp

Obsidian Academy | September 2024 – December 2024

Advanced Diploma - Computer Programming and Analysis

George Brown College | Toronto - April 2024

PROFESSIONAL EXPERIENCE

Device Screening Technician

April 2024 – August 2024

LikeWize | Woodbridge, ON

- Staged and configured Apple iOS Devices, including MacBooks, iPads, iPhones, and Apple Watches
- Ran diagnostics and debugged hardware component issues
- Assigned grading to devices based on reusability
- Troubleshoot computer system problems, including hardware, software, network, and peripheral equipment issues

- Reinstalled operating systems and prepared laptops for shipping
- Installed, configured, and upgraded operating systems and software using standard business and administrative packages

AWS Cloud Computing Trainee (Hybrid)

May 2023 – August 2023

Youth Employment Services | Toronto, ON

- Scripted the launch of EC2 instances, incorporating pre-configuration of User Data using Python, Shell, and Bash
- Designed, developed, and troubleshoot issues with highly available, scalable applications on AWS.
- Applied core AWS services for compute, storage, monitoring and networking (EC2, S3, IAM, VPC, TCP/IP, DNS, DHCP, Lambda, Cloud Formation, RDS, Route 53).
- Communicated effectively with both technical and non-technical audiences.
- Deployed websites and fine-tuned applications with robust cost monitoring and optimization strategies, leveraging AWS CloudWatch for comprehensive performance insights.
- Enhanced proficiency in role management, policies, and user groups, including IAM, for comprehensive identity and access management on AWS.

Technical Support Specialist (Hybrid)

September 2022 – June 2023

Rogers | Toronto, ON

- Managed and resolved customer-reported network issues by handling tickets through platforms like ServiceNow.
- Proficiently managed Microsoft Office 365 for administration tasks, including Teams, Exchange, OneDrive, SharePoint, Intune, EntraID, SSO, Conditional Access policies, and DLP.
- Created and managed users and groups in Active Directory to facilitate access management and permissions.
- Provisioned access to Desktop as a Service (DAAS) platforms such as Citrix to enable remote work capabilities. (Deployments and Installations)
- Troubleshoot hardware accessories and network infrastructure to identify and resolve issues promptly.
- Maintained accurate inventory counts to ensure availability of necessary hardware and accessories for troubleshooting.
- Communicated effectively with customers and remote teams via Genesys Cloud to ensure timely resolution of technical problems.

Customer Service Representative: Debt Collector (Remote)

July 2021 – August 2022

Affinity Global | Toronto, ON

- Handled inbound and outbound calls, negotiating payments and payment arrangements.
- Maintained positive customer experiences.
- Negotiate payments and reasonable payment arrangements.
- Performed Skip tracing to updated user information.
- Dealt with highly confidential information in a secure environment.
